Congratulations!

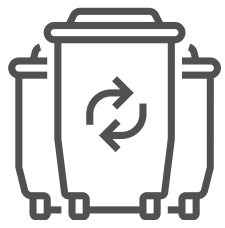

You have made a green choice by staying at a
Green Key certified hotel.

Help us to further reduce our environmental footprint and
our use of resources by following these tips during your stay.

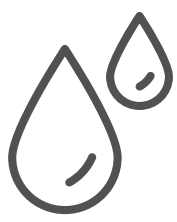

Use the towel an extra day / bed linen

To reduce the use of detergent, water and energy, we offer you the possibility to use your towel an extra day. If you wish to reuse your towel, please hang it up. Otherwise leave it on the floor, and it will be changed.
Bed linen can be changed on request or if stained.

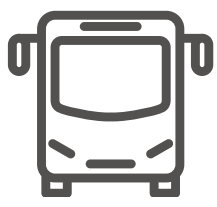

Sort the waste

Waste is a resource that can be reused. Leave paper, newspaper and cans in the room or on the conference table and put bottles and cardboard next to the bin.

Drink water from the tap

1 litre of drinking water from the tap sends between 1000 and 2000 times less CO2 into the atmosphere than 1 litre of bottled water. Tap water is safe to drink.

Use public transportation or bicycles

Bicycles, bus and train are more environmentally friendly than cars. Ask our reception team to find information about public transportation and rental bikes. You are lucky, we even have rental e-bikes!

Find green and blue experiences

There are great natural beauty, hiking, biking or running routes or other green activities around or close to your hotel. Ask at reception for more information.

We think of the environment

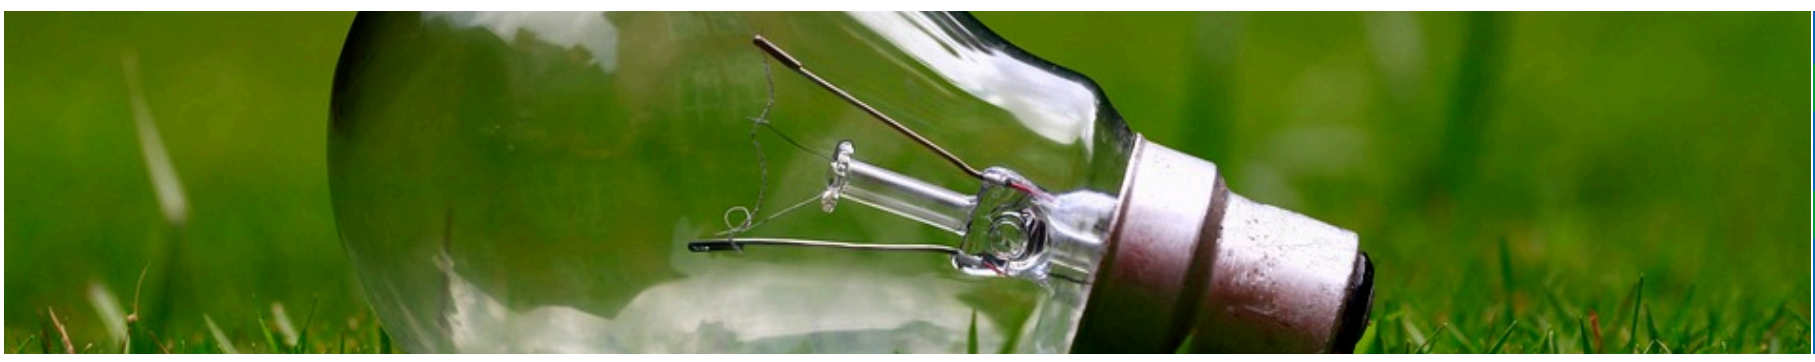

You have chosen a Green Key certified establishment. This means that you are automatically helping to preserve the environment, as we meet Green Key's stringent environmental and sustainability requirements. We make it easier for you to care for the environment without it diminishing your experience and comfort.

We save on water – not on cleanliness

Water is important to us all. We aim to make it easy for you to use less water without it diminishing your experience and comfort.

We have water-saving showers, taps and toilets, so that both you as a guest and we as an establishment save water.

We save on energy – not on lighting

We do not save on lighting, but on energy. We do this by using low-energy lighting, sensors and an intelligent light management system. We make it easy for you to save energy while ensuring that you have cosy, functional lighting.

We save on chemicals – not on hygiene

We use environmentally friendly and environmentally labelled cleaning agents, equipment and work methods, so that less chemicals and water are used. We want you to benefit from a better indoor climate with fewer chemicals from cleaning agents while keeping everything clean and nice.

We sort waste

We sort our waste. We want to make it easy for you to sort your waste too. Please place newspapers, paper, cans, plastic and glass bottles beside the waste bin.

We support sustainable mobility

As a Green Key certified establishment, we make special efforts to preserve the environment. Bus, train and bicycles are environmentally friendly alternatives to regular cars.

We want to make it easy for you to use environmentally friendly forms of transport. See the information in your room or ask at reception for information about public transport, biking and walking routes.
